DIGITAL FORENSIC INVESTIGATION REPORT

Case ID:	1
Case Title:	Unicode & High Risk Incident Investigation ■ - ■■■■
Investigator:	Investigator #1
Report Generation Date:	2026-08-09 05:53:42 UTC
Classification:	CONFIDENTIAL // LAW ENFORCEMENT & FORENSICS ONLY

1. Executive Summary

Analysis completed for Case #1 ('Unicode & High Risk Incident Investigation ■ - ■■■■'). Calculated risk score is 14/100 (LOW). No active threat propagation or data exfiltration chains were detected across evaluated digital evidence files.

2. Case Information

Case ID	Title	Status	Priority	Created At
1	Unicode & High Risk Incident Investigation ■ - ■■■■analysis		medium	2026-08-09 05:53:41 UTC

3. Evidence Summary & Integrity

ID	Filename	Type	Size (Bytes)	SHA-256 Hash	Status
1	auth_audit.csv	csv	1024	1234567890abcdef...	pending
2	syslog_export.json	json	2048	abcdef1234567890...	pending

4. CSP Validation & Knowledge Graph Metrics

Graph Nodes	Graph Edges	CSP Status	CSP Pass Ratio
0	0	PASSED	100%

5. Reconstructed Attack Path

No active attack path sequence detected.

6. Chronological Incident Timeline

7. Risk Assessment & Forensic Conclusion

Risk Score: 14/100 (LOW)

Scoring Factors & Reasons:

- CSP Backtracking validated temporal consistency (100% rule compliance).

Conclusion:

Case #1 evaluation concluded with LOW risk footprint (Score: 14/100). No malicious exfiltration or privilege escalation chains were confirmed by digital evidence.
